Jersey City, NJ | 302-312-3276 | jeetd6220@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Data engineering-focused MS Data Science student with hands-on experience in data collection and developing data architecture, quality frameworks, and monitoring to ensure data availability. Skilled in SQL, Python, cloud computing on Amazon Web Services, and big data technologies (Hadoop, Hive, Spark, EMR), with direct experience building and verifying hypotheses through statistical analysis, A/B testing, and causal inference. Experienced applying advanced analytics, prediction, clustering, and machine learning, and improving reporting and self-service processes to meet customer needs.

PROFESSIONAL EXPERIENCE

NexGits Private Limited — Data Analyst Intern

Ahmedabad, India | Jun 2024 – Jul 2025

- Designed ETL pipelines in Python and SQL to extract, transform, and load structured data across multiple relational tables, identifying and resolving data inconsistencies and reducing prep time by 30%.
- Continually improved ongoing reporting processes, simplifying self-service Power BI, Tableau, and Excel dashboards that directly informed 3 strategic decisions within the first month.
- Automated recurring data processing workflows using Python, improving data availability and reducing manual effort by 40%.

ACADEMIC & PERSONAL PROJECTS

Causal Inference & A/B Testing — Hypothesis Building & Verification

May 2026

- Partnered statistical rigor with business questions to build and verify a hypothesis on a 90,189-user A/B test, applying sample-ratio-mismatch checks and significance testing to validate a real business opportunity.
- Developed a statistical model (Difference-in-Differences) to verify the causal impact of a real-world business disruption (+12.44pp, 95% CI [7.44, 17.44], $p < 0.0001$), validated with a placebo test; code: github.com/jd878-gif/causal-inference-ab-testing

E-Commerce Data Pipeline — Statistical Analysis, Prediction & Clustering

Feb 2026 – Apr 2026

- Analyzed 100K+ records using statistical analysis, prediction, and clustering algorithms — Sales Forecasting (Linear Regression), Customer Churn Prediction (classification), and K-Means Segmentation — to exploit the dataset for business insight.
- Delivered an interactive Tableau dashboard with live KPI filters, translating complex analysis into clear recommendations for non-technical stakeholders.

FraudSentinel — Data Architecture, Quality & Availability

Mar 2026 – Apr 2026

- Developed and improved data architecture across 10 AWS services processing 507K+ transactions, implementing data quality monitoring that maintained zero dead-letter-queue failures and consistent data availability across all runs.
- Applied machine learning (XGBoost classifier, AUC: 1.00) for prediction, engineering features from raw transaction data and delivering automated alerting in under 30 seconds.

Kubernetes Data Platform — Big Data Pipeline Scaling on AWS EKS

May 2026 – Aug 2026

- Designed and piloted a scalable data architecture on Kubernetes (AWS EKS) using Apache Spark and Airflow, processing large-scale data through a Bronze/Silver/Gold architecture to support increasing data volumes.

TECHNICAL SKILLS

- Data Engineering & Big Data:** Data Engineering, Data Collection, Big Data, Hadoop, Hive, Apache Spark, PySpark, AWS EMR
- Languages & Query:** Python, SQL, PL/SQL, DDL, Scala, KornShell, R
- ETL Tools:** Informatica, IBM DataStage, SSIS
- Statistical Analysis & ML:** Advanced Analytics, A/B Testing, Causal Inference (DiD), Hypothesis Testing, Machine Learning, AI, Prediction, Clustering, Algorithms, XGBoost
- Data Architecture & Quality:** ETL/ELT Pipelines, Data Modeling, Data Warehousing, Data Quality Frameworks, Monitoring & Availability
- Cloud Computing & AWS:** Amazon Web Services (S3, Glue, Lambda, Step Functions, Athena, SageMaker, CloudWatch, EMR), AWS Redshift, Kubernetes, Docker, Terraform
- Reporting & Collaboration:** Power BI, Tableau, Excel, Streamlit, Cross-Functional Collaboration, Problem Solving, Git/GitHub

EDUCATION

New Jersey Institute of Technology — MS in Data Science | GPA: 3.5

Newark, NJ | Expected May 2027

Indus University — BS in Computer Science & Engineering | GPA: 3.8

Ahmedabad, India | May 2025

CERTIFICATIONS

AWS Machine Learning | Amazon Web Services | Jul 2024 – Nov 2024
